PCEradiation H

The photograph shows a Rohde & Schwarz GSM 100 analyzer in a rack. The top screen displays 'GSM 100 Overview' with various parameters. Below it, a spectrum analyzer shows a frequency spectrum. A green cable is connected to the analyzer's output and runs down to a mobile phone on a wooden table. The phone is connected to the cable via a small adapter. The setup is used for analyzing GSM signals from a mobile device.
